

Exercise 9, Discrete Mathematics for Bioinformatics

Sascha Meiers, Martin Seeger

Winter term 2011/2012

9.1 PORTA — Polyhedron Representation Transformation Algorithm

a) `$ lp_solve example1.lp`

Value of objective function: 2.5

Actual values of the variables:

x1	1.5
x2	0
x3	0.5
x4	0.5

b)

9.2 Branch and Bound

x
